

## PRESS RELEASE

Beginning the week of April 2<sup>nd</sup>, the Town of Wenham along with Hiltz Disposal implemented a new trash / compost / recycling program. In order for the new trucks to pickup the trash barrels they must be placed two feet from the curb (or street) and three feet away from any other barrels or bins. Each trash barrel is marked on the top with **“This side to street”**. Please make sure your barrels are positioned properly. The handle you push it with should be closest to your home and the bar located half way down on the front of the barrel should be facing the street for easy pickup. Please have all trash / compost / recycling curbside by **7:00am** on your regular pickup day. If you have any questions, please contact the DPW Department @978-468-5520 X6
